Skills

React, Redux toolkit, HTML, CSS, Sass, JavaScript, bootstrap, Git, Responsive Design, RESTful APIs

Work History

Diet website *(front-end) - code demo*

- Developed a diet app using React
- Integrated APIs from a Node.js server
- The app is a website focused on helping users achieve health and fitness goals
- Allows users to create personalized meal plans
- Users can input a minimum of 3 foods per meal
- The app generates a custom meal plan based on individual needs

Tetris game *- code demo*

- Developed a fully functional Tetris game from scratch
- Used React.js and Redux Toolkit
- Classic gameplay mechanics, including falling tetromino pieces and line clearing
- Implemented increasing difficulty levels up to 10 levels
- Utilized Redux Toolkit for state management

IP tracker app *- code demo*

- Created an IP tracker app using Leaflet, React, and Redux Toolkit
- Enables users to track and visualize IP addresses on an interactive map
- Provides real-time geolocation data
- Displays detailed information about the tracked IP addresses
